A Descriptive Catalogue of the Music of Charles Ives-James B. Sinclair 1999-01-01 This catalogue of the music of Charles Ives contains 728 entries covering all of the prolific composer's works. James Sinclair's book presents information produced by recent Ives scholarship and generous commentary on each of Ives's compositions. It completes the work begun by musicologist John Kirkpatrick in 1955, when Ives's music manuscripts were deposited in the Yale Music Library. Ives's works are arranged alphabetically by title within genres. Whenever possible, each entry includes the main title and any other titles the composer may have used; the forces required; the duration; headings of movements; publication history; citation of the first known performance and first recording; the derivation of the work, listing music on which it may be modeled or from which it may borrow material; the principal literature treating the piece; and commentary on these and other matters. The catalogue also provides musical incipits for all Ives's extant works, seven appendixes (covering his work lists, 'Quality Photo' lists, his songbooks, a chronology of his life, recordings made by Ives, and his private publications and commercial publishers), three concordances, and four extensive indexes (addresses, names, titles, and musical borrowings).

Salmonella in Domestic Animals-Paul A. Barrow 2013 Salmonella remains a major cause of economic loss in domestic livestock and human food poisoning worldwide. In the last 10 years there have been major advances in understanding the salmonella organism, meaning a compiled source of the new research is urgently needed. With fully updated chapters and new coverage of genome structure, virulence, vaccine development, molecular methods for epidemiology and exotics, this second edition is an invaluable resource for researchers of animal and human health.

Artemisia annua - Pharmacology and Biotechnology-Tariq Aftab 2013-11-26 Artemisinin, a sesquiterpene lactone originally extracted from the medicinal plant *Artemisia annua* L., is an effective antimalarial agent, particularly for multi-drug resistant and cerebral malaria. However, the concentration of artemisinin in the plant is very low. Because the chemical synthesis of artemisinin is complicated and not economically feasible in view of the poor yield of the drug, the intact plant remains the only viable source of artemisinin production. Therefore, it is necessary to increase the concentration of artemisinin in *A. annua* to reduce the cost of artemisinin based antimalarial drugs. Plant scientists have focused their efforts on *A. annua* for a higher artemisinin crop yield. With the present volume, we are bringing together the research which is being done on this plant throughout the world and future possibilities for scientists and researchers who want to work on it.

Consilience-E. O. Wilson 2014-11-26 "A dazzling journey across the sciences and humanities in search of deep laws to unite them." --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

Food Hydrocolloids-K. Nishinari 2012-12-06 It is now well recognised that the texture of foods is an important factor when consumers select particular foods. Food hydrocolloids have been widely used for controlling in various food products their viscoelasticity, emulsification, gelation, dispersion, thickening and many other functions. An international journal, *FOOD HYDROCOLLOIDS*, launched in 1986 has published a number of stimulating papers, and established an active forum for promoting the interaction between academics and industrialists and for combining basic scientific research with industrial development. Although there have been various research groups in many food processing areas in Japan, such as fish paste (*kamaboko*, *surimi*), soybean curd (*tofu*), agar jelly dessert, kuzu starch jelly, *kimizu* (Japanese style mayonnaise), their activities have been conducted in isolation of one another. The interaction between the various research groups operating in the various sectors has been weak. Symposia on food hydrocolloids have been organised on several occasions in Japan since 1985. Professor Glyn O. Phillips, the Chief Executive Editor of *FOOD HYDROCOLLOIDS*, suggested to us that we should organise an international conference on food hydrocolloids. We discussed it on many occasions, and eventually decided to organise such a meeting, and extended the scope to include recent development in proteinaceous hydrocolloids, and their nutritional aspects, in addition to polysaccharides and emulsions.

Analyzing Microbes-Dilip Kumar Arora 2013 This Springer Protocols manual is a practical guide to the application of key molecular biology techniques in microbiological research. The focus is on experimental protocols, which are presented in an easy-to-follow way, as step-by-step procedures for direct use in the laboratory. Notes on how to successfully apply the procedures are included, as well as recommendations regarding materials and suppliers. In addition to the practical protocols, important background information and representative results of experiments using the described methods are presented. Researchers in all areas applying microbial systems, such as in molecular biology, genetics, pathology, and agricultural research will find this work of great value.

The Encyclopedia of Country Living-Carla Emery 2011-05-02 No home, whether in the country, the city, or somewhere in between, should be without this one - of - a - kind encyclopedia - the most complete source of information available about growing, processing, cooking, and preserving homegrown foods from the garden, orchard, field, or barnyard. For more than 30 years, people have relied on its practical, step - by - step advice on basic self - sufficiency skills such as how to cultivate a garden, buy land, bake bread, raise farm animals, make sausage, milk a goat, grow herbs, churn butter, build a chicken coop, cook on a wood stove, and much, much more. First written at the height of the 1960s back - to - the - land movement, the book has been continually revised, updated, and expanded, and has grown from a self - published, mimeographed document to an exhaustive reference of more than one million words, 2,000+ recipes, and over 1,500 mail order sources. Emery's personal advice, reflections, and anecdotes ensure that this incredibly detailed, diverse reference is as enjoyable as it is useful.

Albertanus of Brescia-James Powell 1992-01-01 Albertanus of Brescia is an important figure in the cultural history of late medieval and Renaissance Italy. He is best known among literary scholars for the influence of his writings on Brunetto Latini, John Gower, and Geoffrey Chaucer. In addition, his sermons have received attention as part of the history of lay confraternities and lay preaching in the twelfth and thirteenth centuries. James M. Powell shows that Albertanus's contributions considerably surpass even these notable attainments. Powell contends that Albertanus was an original social theorist who drew on his experience with religious confraternities and with the law to develop a theory of consent. Albertanus developed the idea that society rested on voluntary acceptance of a rule, much as did religious life. This acceptance laid the foundation for social cohesion and legal enforcement. Albertanus's ideas were to find great prominence in the later Middle Ages. Powell's purpose in writing *Albertanus of Bresciagoes* beyond the study of his eponymous subject. Through Albertanus, Powell examines how major developments of the twelfth century began to find expression in the mind of an early thirteenth-century secular thinker. In Albertanus, Powell perceives an individual bringing received, bookish authority into confrontation with lived experience. To Powell, the example of Albertanus suggests a much more complex picture of medieval approaches to social theory than that previously evident in the literature. This is the first book-length study of Albertanus and his works. It will be of particular interest to students and scholars of medieval, Italian, intellectual, and literary history, and political theory.

Advances in Multimedia Information Processing - PCM 2005-Yo-Sung Ho 2005-10-31 We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers

that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.

Inedible Meat by-Products-A. M. Pearson 2013-03-13 Inedible meat, poultry and fish by-products are major contributors to the profitability of the slaughterers and processors of all types of muscle food. Although the by-products per se make important economic contributions to the productivity of the industries, their importance varies widely between classes and for different species. As important as this may be, the utilization of the otherwise waste by-products has become even more crucial from the standpoint of protecting the environment. Hence, the editors decided that a book dealing with inedible meat, poultry and fish by-products would be useful not only to slaughterers and processors, but also to those involved in research and teaching. Focusing on the advanced stages of the useful inedible products and methods involved in their production could very well lead to new and better uses for by-products as well as in improving the environment. As in past volumes of this series, the authors are leaders in their respective fields of discussion. Their expertise provides not only a background on present industrial practices but also areas and means for improving the production of by-products.

The Rise and Decline of the Medici Bank, 1397-1494-Prof. Raymond de Roover 2018-03-12 The roots of modern capitalism go back to the Italian banking system of the late Middle Ages and the Renaissance. In the fifteenth century, the Medici Bank succeeded in overshadowing its competitors, the Bardi and the Peruzzi, who were the giants of the fourteenth century, and grew into a vast establishment with branches in most of the large cities of Western Europe. A study of its operations is essential to an understanding of the economic conditions in Europe in the fifteenth century. From a careful study of pertinent documents, including a set of *libri segreti* (confidential ledgers) discovered in 1950, Professor de Roover has reconstructed the details of the bank's organization and operating methods; its loan policies, which reflected the Church's doctrine on usury; its trading and industrial investments; its roles within the Florentine guild system and tax structure; and its activities as financial agent of the Church. He covers every aspect of the bank's history, from its early years under the management of Giovanni di Bicci de' Medici to its collapse with the expulsion of the Medici from Florence. "An invaluable contribution to the economic history of the period....A splendid book."—Harry A. Miskimin, *The American Economic Review* "The most important work in English on a medieval or Renaissance bank."—*The Economist* "The best book ever written on the medieval banking system."—John T. Noonan, Jr., *Harvard Law Review* "The most authoritative treatment of its subject in any language."—Rondo Cameron, *The Accounting Review*
