[...] it is a considerable achievement to have concentrated a survey of the subject into 339 pages. [...] a valuable and welcome addition to the literature, containing many results not previously available in a book. It will undoubtedly become a standard reference." Mathematical Reviews

Dancing on Broken Glass-Ka Hancock 2012-03-13 A powerfully written novel offering an intimate look at a beautiful marriage and how bipolar disorder and cancer affect it, Dancing on Broken Glass by Ka Hancock perfectly illustrates the enduring power of love. Lucy Houston and Mickey Chandler probably shouldn't have fallen in love, let alone gotten married. They're both plagued with faulty genes—he has bipolar disorder, and she has a ravaging family history of breast cancer. But when their paths cross on the night of Lucy's twenty-first birthday, sparks fly, and there's no denying their chemistry. Cautious every step of the way, they are determined to make their relationship work—and they put it all in writing. Mickey promises to take his medication. Lucy promises not to blame him for what is beyond his control. He promises honesty. She promises patience. Like any marriage, they have good days and bad days—and some very bad days. In dealing with their unique challenges, they make the heartbreaking decision not to have children. But when Lucy shows up for a routine physical just shy of their eleventh anniversary, she gets an impossible surprise that changes everything. Everything. Suddenly, all their rules are thrown out the window, and the two of them must redefine what love really is. The Wayward Mind-Guy Claxton 2006 The unconscious has had a long and chequered history. For at least the last 4,000 years, societies have concocted comforting fables in the face of the recurrent puzzles of human existence - death, dreaming, madness, possession, inspiration - that invariably rely on some notion of the unconscious. Supernatural 'fairy stories' need some internal proxy or contact point through which the influence of demons and spirits can flow. And without such gods and forces, some psychological machinery is needed to take over their work. But what IS the unconscious? Is it 'God's viceroy', the soul? Is it the locked ward of Freudian desire? Is the subliminal mind the source of the sublime emotions of the Romantics? Is is the mental microchip of cognitive science? Or is it simply the brain?

The Cosmo Kama Sutra-Cosmopolitan 2009 Presents instructions for seventy-seven lovemaking positions and explains the reasons why they are enjoyable.

Labyrinth-Daidō Moriyama 2012 Contact sheets ordinarily don't leave the confines of a photographer's studio. They are meant for the photographer's eyes alone-a tool to aid in the hunt for a single frame to enlarge and print. The contact sheets reproduced in this volume, however, no longer serve that purpose. Instead, they offer a means of reconsideration, a vehicle for the photographer Daido Moriyama to review the span of his career and to recompose his work. The pages of this publication reproduce a series of individual contact sheets that Moriyama has created by mixing together negatives from disparate rolls of film. In a single sheet, work from different periods of his fifty-year-long career are juxtaposed by the artist. Work shot in the 1960s, for example, appears alongside images shot recently. While each sheet has a certain theme, taken as a whole, each individual frame is given equal standing regardless of its chronology or provenance; Moriyama makes little or no distinction between each instance of the shutter's release. Contact-printed negatives of Moriyama's best-known images appear side-by-side with previously unselected and unreleased material, radically flattening the traditional hierarchy of the "masterpiece." Instead, the totality of his work reveals volumes more than singular, isolated images.
